Since I do pay for this service, I want my money's worth of service. Our NAB cannot seem to provide this service of weather and traffic on a basis that is needed. While traveling the United States, it is almost impossible to get any traffic reports from the air wave radios after rush hour. I have found this XM radio to be both a great benefit as well as an improved safety and entertainment tool.

As the FCC considers this proposal to limit what we can receive on our subscriptions, consider that fact that since there is not any clear channel stations with any power as was in the past, just who are the customers that NAB are losing???

Certainly, the force of just a couple million listeners are not this big a threat to such a group of broadcasters that seem to only broadcast commercials 24 hours a day. The joy I feel just waiting at 3 am for the traffic report just to avoid the road construction, only to find out after I am sitting it that the commercial station has NO reports for the public after 6 pm nor before 6 am is so considerate of them. Glad that I can be so needed by the NAB that they must cry to have their business' protected from a service that benefits those who PAY for the service. As if I would listen to their station anyway? What for since they are not even providing what it is I am listening for.

Shame on them that scream when someone wants to limit their freedoms, but are willing to limit mine! There is a name for this..... I do wonder if any one feels just a little like a hypocrite???

Thank you for letting me comment as this is the first time I have felt the need to.
